\$4.5M portfolio managed | **100%** on-time sponsor reporting | **4** institutions coordinated | **7** publications supported

PROFESSIONAL SUMMARY

Healthcare Program Manager with 7+ years of experience across research operations, clinical care delivery, public health, and quality management. Currently stewards a **\$4.5M portfolio** spanning an NIH R01 (EPPC) and a PCORI-funded study (PVminer) at Yale University, sustaining a **100% on-time record** across all budget and sponsor reporting deadlines for **two consecutive years** while coordinating **4 partner institutions**. Builds and mobilizes multidisciplinary research teams, drives IRB-aligned regulatory compliance and participant recruitment, and converts clinical data operations into peer-reviewed research published and accepted across AMIA and Nature-affiliated journals. Combines a clinical background (MPH, BAMS) with hands-on grant administration, cross-institutional stakeholder governance, and data quality leadership to move complex healthcare research programs from planning through execution and publication.

CORE COMPETENCIES

Program Governance & Compliance: HIPAA compliance, IRB protocol adherence, informed consent preparation, regulatory & sponsor compliance, audit-ready documentation, quality control auditing, corrective action planning

Financial & Grant Stewardship: Multi-grant budget development and reconciliation (\$4.5M NIH R01 / PCORI portfolio), subaward and milestone tracking, NIH RPPR and PCORI sponsor reporting, procurement and invoice processing, cost-conscious vendor management

Program & Research Operations: Multi-institutional program coordination, participant recruitment and enrollment, SOP and process development, priority management across concurrent workstreams, risk mitigation

Team Leadership & Development: Team building and supervision, onboarding design, performance and assignment management, cross-functional issue resolution

Data & Technical Proficiency: REDCap, Epic, OnCore, Power BI, Microsoft Excel/Word/PowerPoint/Outlook/SharePoint, MS Forms, clinical data annotation and quality control, EHR-based documentation

Stakeholder & Governance: Community Advisory Board coordination, multi-institutional liaison (Yale, Cleveland Clinic, VHA, TXACC), manuscript and publication support

PROFESSIONAL EXPERIENCE

Program Manager

Nov 2024 - Present

Yale University

Grant & Financial Operations

- Steered grant and financial operations across the EPPC and PVminer initiatives totaling **\$4.5M** by building budgets, tracking expenses, and reconciling accounts, sustaining a **100% on-time record** for all budget and sponsor reporting deadlines over **two consecutive years**.
- Assembled and delivered **5-8 formal sponsor reports annually**, including NIH RPPRs and semiannual PCORI progress reports, synthesizing investigator inputs to hit **every submission deadline on time**.
- Negotiated subaward coordination and milestone tracking across **2 subawards** spanning both grants, monitoring deliverables, expenditures, and contract timelines to keep spending **fully aligned** with award terms.
- Reconciled day-to-day procurement, invoicing, and reimbursement activity against program budgets, upholding **full compliance** with institutional policy across all transactions.
- Disbursed monthly invoices for **8+ Community Advisory Board members over 1.5 years**, achieving **100% on-time payment** with zero missed cycles.

Team Leadership & Supervision

- Recruited, onboarded, and mentored a core research team of **8** (5 postdoctoral researchers, 1 research associate, 1 PhD rotation student, 1 intern), aligning system access, training, and assignments to bring the team to **full productivity quickly**.
- Codified onboarding through SOPs and structured training materials, **improving workflow consistency** and **accelerating ramp-up** for new and rotating staff.

- Anchored as the operational point of contact for the team, triaging day-to-day issues and realigning assignments with program priorities, which **reduced issue resolution time**.

Regulatory, Consent & Recruitment (EPPC R01 Study)

- Drafted the informed consent form in accordance with IRB protocol for the EPPC R01 study, closing a critical compliance requirement ahead of active recruitment.
- Compiled IRB submission materials supporting protocol approval for the study.
- Personally secured informed consent from and enrolled **40 patients within 3-4 weeks** for the EPPC R01 study, closing the consent-and-recruitment gap on the research team and keeping enrollment on schedule.

Stakeholder & Governance Coordination

- Facilitated **50+ recurring stakeholder meetings over 18 months** with an 8-9-member Community Advisory Board, shaping the review and validation cycle behind every research tool output.
- Arranged full in-person CAB meeting logistics, including scheduling, space, facilitation, and catering, managing food and beverage arrangements **within the allotted program budget**.
- Represented the program as central liaison across investigators at **4 institutions** (Yale, Cleveland Clinic, VHA, TXACC), aligning agendas, follow-up items, and communications on shared deliverables.

Research Contribution, Annotation & Publications

- Spearheaded **70-75% of the annotation** underpinning the EPPC project, manually annotating **3,500+ patient messages (~10,000 sentences)** across multiple hospitals and clinics into structured, analysis-ready data for AI/NLP research on patient-provider communication.
- Authored the **EPPC annotation guidelines and codebook**, grounding the coding scheme in the **Roter Interaction Analysis System (RIAS)** to capture communication function and intent, and built the accompanying annotation **manual** that postdoctoral researchers and rotation students used to code messages consistently, directly enabling the benchmark reported in **EPPCMinerBen**.
- Designed the annotation framework and codebook for the **PVminer** grant, operationalizing definitions of patient voice and the social barriers patients face within the healthcare system, work that fed the tool development and analysis behind the **PVminer** and **PVminerLLM** publications.
- Elevated annotation and documentation workflows by **25-30%**, strengthening consistency, accuracy, and reproducibility across both the EPPC and PVminer research pipelines.
- Prepared structured datasets and supporting analyses that underpin **7 peer-reviewed and preprint publications** in 2026, including two now accepted at **Scientific Reports (Springer Nature)** and **Nature Digital Public Health**, shepherding manuscript revisions through to acceptance.

Office Administrator

Oct 2024 - Jan 2025

Quality Staffing Home Care Agency, USA (part-time, held concurrently with the Yale Program Manager role)

- Ran core office operations using SharePoint and MS Forms to schedule appointments, coordinate calendars, and manage correspondence for leadership, **streamlining scheduling** and reducing conflicts.
- Processed biweekly payroll for **50+ employees** across administrative and caregiver departments with full accuracy and credentialing compliance, delivering **on-time pay across 10 consecutive pay cycles**.
- Oversaw licensing and grant applications for the agency and its training school, maintaining **full regulatory compliance**.
- Maintained client and employee records in AxisCare and Alora and tracked bill payments, keeping records continuously **audit-ready**.

Health and Recreation Service Administrator

Mar 2023 – May 2024

David A Beckerman Recreation Center, USA

- Served as principal liaison for members, guests, and visitors, **boosting customer satisfaction by 25%** through efficient issue resolution.
- Directed facility operations, fitness areas, and event setups with **zero operational errors**, ensuring adherence to public health standards.
- Hired and trained new staff, **lifting team efficiency by 30%** while maintaining precise operational records.
- Awarded **Employee of the Year (2024)** for leadership and commitment to community health initiatives.

Public Health Research Intern

Jun 2023 – Aug 2023

Connecticut State Department of Public Health, USA

- Revamped the Office of Health Equity website, improving communication of the office's mission and resources.
- Assessed agency-wide practices to verify compliance with race, ethnicity, and language (REL) standards under Public Act 21-35.
- Established standardized data collection procedures, improving accuracy and regulatory alignment.
- Generated and tracked assessment forms using MS Forms to support timely, complete demographic data analysis.

Quality and Compliance Analyst

Dec 2021 – Aug 2022

Vasta Bioinformatics Pvt. Ltd., India

- Audited GI cancer research cases for the Dana-Farber Cancer Institute using program-tracking tools and Excel, ensuring accurate data collection and **improved overall data quality**.
- Delivered actionable feedback to abstractors **within 24 hours**, maintaining protocol adherence and quality standards.
- Rolled out corrective action plans and retraining sessions, **increasing data accuracy** and boosting staff performance.

Public Health Physician

Aug 2020 – Dec 2021

Nesco Jumbo Covid Center, India

- Conducted **100+ patient rounds**, monitoring vitals, radiography, EKGs, and lab results.
- Performed emergency procedures, including CPR and catheterization, and administered medications in accordance with HIPAA-compliant protocols and SOPs, ensuring **rapid stabilization** of critical patients.
- Documented patient care with precision to support timely interventions and comprehensive treatment.

Clinical Operations Lead

Apr 2019 – Aug 2020

Inventurus Knowledge Solutions Pvt. Ltd., India (IKS Care, aligned with Advocate Health)

- Embedded as lead medical scribe for **10+ physicians** across Internal Medicine, Family Medicine, Urgent Care, Neurology, and Endocrinology within Advocate Health, including dedicated scribing for the health system's **chief physician**.
- Sustained **100% documentation precision** across all scribed clinical encounters while maintaining a turnaround time of **under 5 minutes per note**.
- Allocated cases and tracked daily productivity in Excel to optimize team efficiency.
- Built and delivered training sessions for new team members, **cutting onboarding time by 30%** and **lifting customer satisfaction by 20%**.

Clinical Intern & Health Policy Trainee

Mar 2018 – Mar 2019

St. George's Hospital & Podar Hospital, India

- Handled outpatient departments managing **80-100 daily patient inflow** and emergency casualties, performing suturing, wound dressing, and minor fracture care while drafting emergency records that supported faster treatment decisions.
- Rotated through clinical rounds for **250+ hospitalized patients** across Medicine, Surgery, Ob-Gyn, Ophthalmology, Pediatrics, and Panchakarma, contributing to patient-care protocol development.

SELECTED PUBLICATIONS (FODEH LAB, YALE) - 2026

EPPC (Electronic Patient-Provider Communication)

- Co-author, **EPPCMinerBen** - Published, AMIA (American Medical Informatics Association). Introduces the first benchmark purpose-built to evaluate large language models on real electronic patient-provider communication via the patient portal, using the **RIAS-based annotation codebook and manual** authored for this project.
- Co-author, **TAB-PO** - arXiv preprint. Proposes a token-level adaptive barrier for preference optimization, a new mechanism for controlling structured generation at the points where token choice is most critical.
- Co-author, **STaR-DRO** - arXiv preprint. Introduces stateful Tsallis reweighting, a novel distributionally robust training method for group-robust structured prediction.
- Co-author, **EPPC-OASIS** - Introduces an ontology-aware adaptation and structured inference refinement framework for mining electronic patient-provider communication in secure messages.

PVminer (Patient Voice)

- Co-author, **PVminer** - Accepted, Scientific Reports (Springer Nature). Presents a new domain-specific tool for detecting patient voice in patient-generated data, grounded in the annotation framework built to operationalize patient voice and social barriers in healthcare.
- Co-author, **PVminerLLM** - Accepted, Nature Digital Public Health. Introduces a structured extraction approach for pulling patient voice from patient-generated text using large language models.
- Co-author, **PVminerLLM2** - arXiv preprint. Extends PVminerLLM with preference optimization to further improve structured extraction accuracy.

EDUCATION

Master of Public Health (MPH) - University of New Haven, West Haven, CT | GPA 3.96 | Aug 2022 - May 2024

Bachelor of Ayurvedic Medicine and Surgery (BAMS) - R. A. Podar Medical College, Mumbai, India | 1st Rank (70.27%) | Nov 2013 - Mar 2019

CERTIFICATIONS

- Good Clinical Practice (GCP): National Institute on Drug Abuse (NIDA)
- CITI Biomedical Research & Human Subjects Protection Training
- Annual HIPAA Refresher Certification
- Emergency Management: Federal Emergency Management Agency (FEMA)

AWARDS

- Employee of the Year (2024): David A Beckerman Recreation Center
